Title: **Fix My Community: A Community Issue Reporting and Monitoring System**

Fix My Community is a web-based application designed to help residents report community issues and monitor their progress toward resolution. The system allows residents to submit concerns, provide relevant details and locations, and track the status of their reports. It also provides administrators with tools to review reports, manage their status, and monitor community concerns through a centralized dashboard.

The system aims to improve communication between residents and local administrators, promote transparency, and support more organized and efficient community issue management.

System Functions

A. User Authentication and Account Management

- Allows residents to register, log in, and manage their accounts.
- Provides role-based access for residents and administrators.
- Restricts administrative functions to authorized users.

B. Community Issue Reporting

- Allows residents to submit reports about community concerns.
- Collects the report title, description, category, and location.
- Records the date and time the report was submitted.
- Associates each report with its submitting user.

C. Report Tracking

- Allows residents to view their submitted reports.
- Displays the current status of each report.
- Tracks report progress through the following workflow: Submitted, Verified, In Progress, and Resolved.

D. Administrative Report Management

- Allows administrators to view and manage community reports.
- Enables administrators to review reports and update their statuses.
- Supports the recording of administrative notes and report assignments where applicable.
- Maintains report information for monitoring and follow-up.

E. Monitoring Dashboard

- Displays the total number of community reports.
- Summarizes reports according to their status.
- Helps administrators monitor pending, ongoing, and resolved concerns.
- Provides an overview of community reporting activity.

F. Barangay Administrator Access

- Allows residents to request authorization to become barangay administrators.
- Supports a proposed barangay code request and verification process.
- Enables authorized administrators to manage reports within their assigned barangay.

Note: The barangay code request workflow and Super Admin functions are planned enhancements and they have not yet been implemented in the current application.

System Screenshots

Figure 1. Landing Page

Displays the interface where users can either sign in or create an account before being redirected to either the Login Page or account Creation Page.

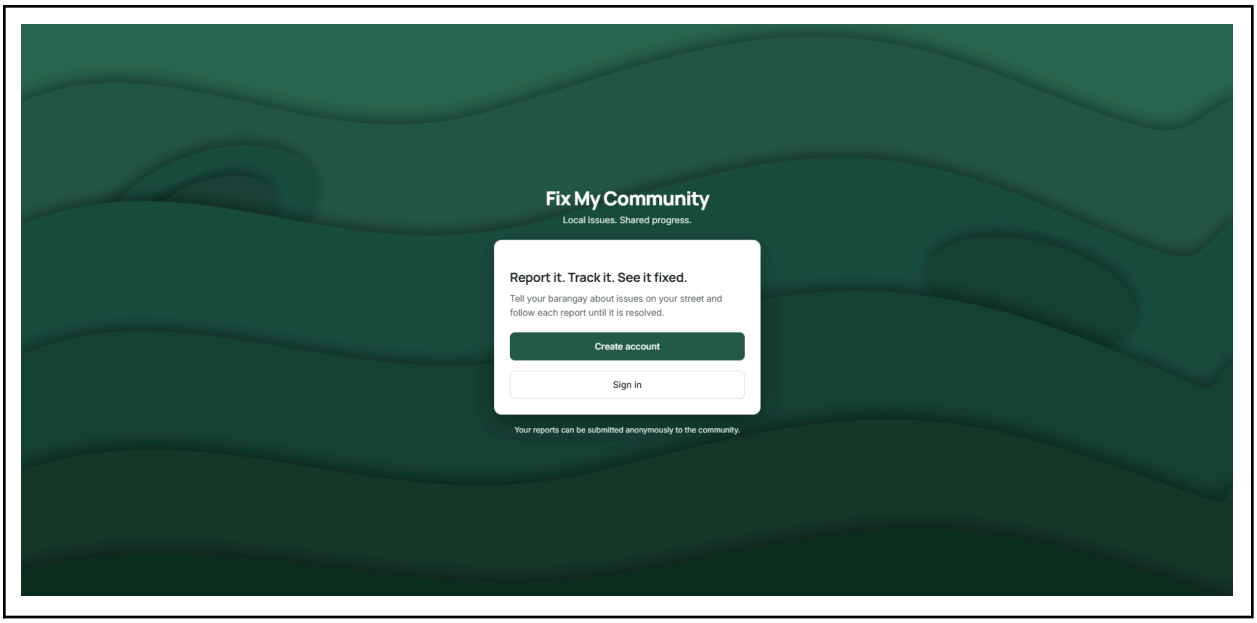

Figure 2. Login Page

Displays the login interface where registered users enter their credentials to access the system.

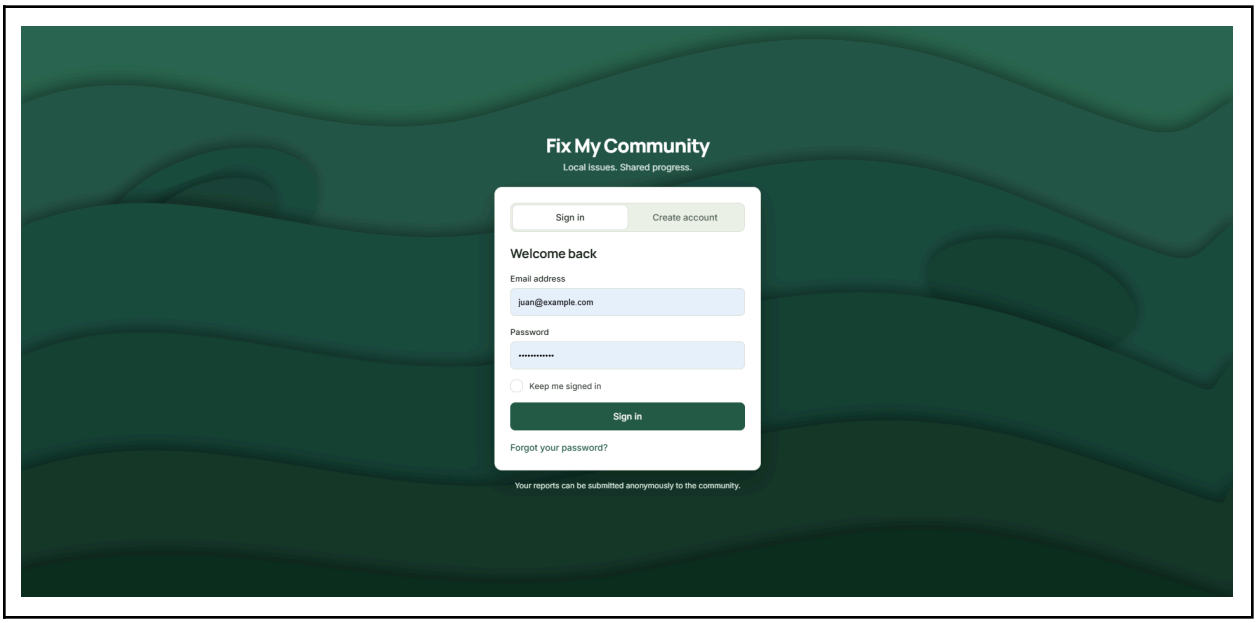

Figure 3. Resident Dashboard

Shows the resident's dashboard, providing access to report submission and the monitoring of previously submitted concerns.

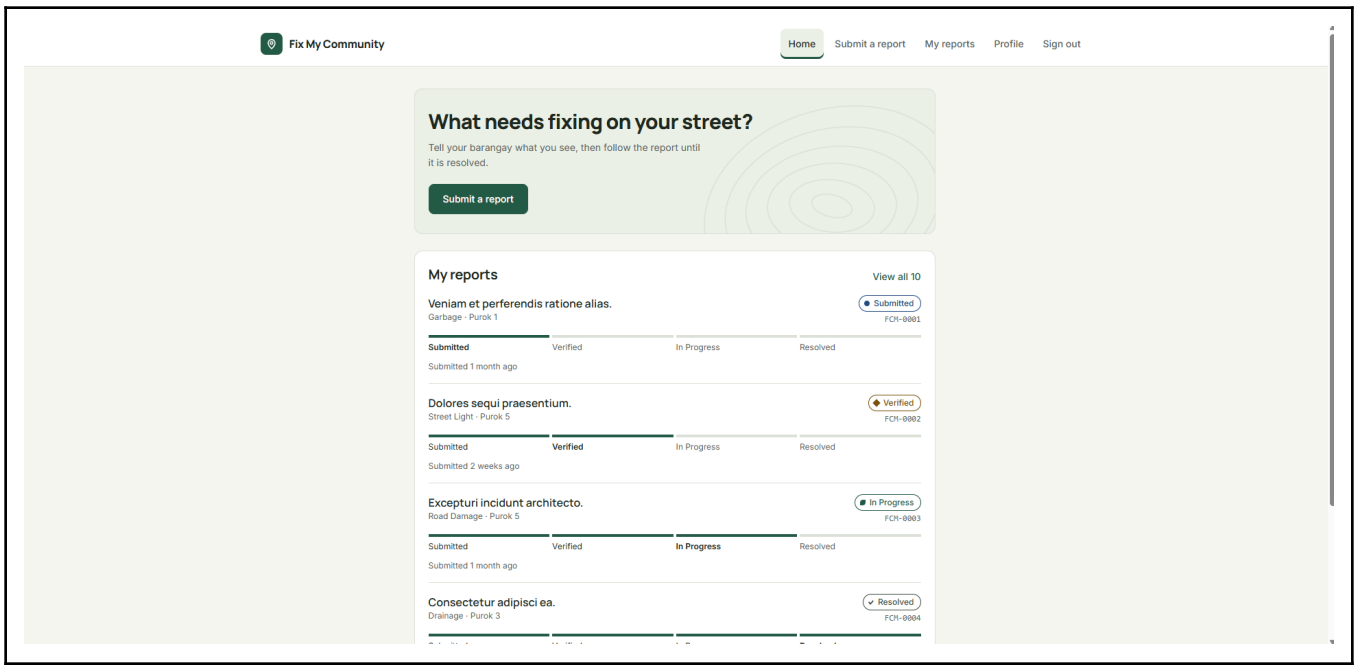

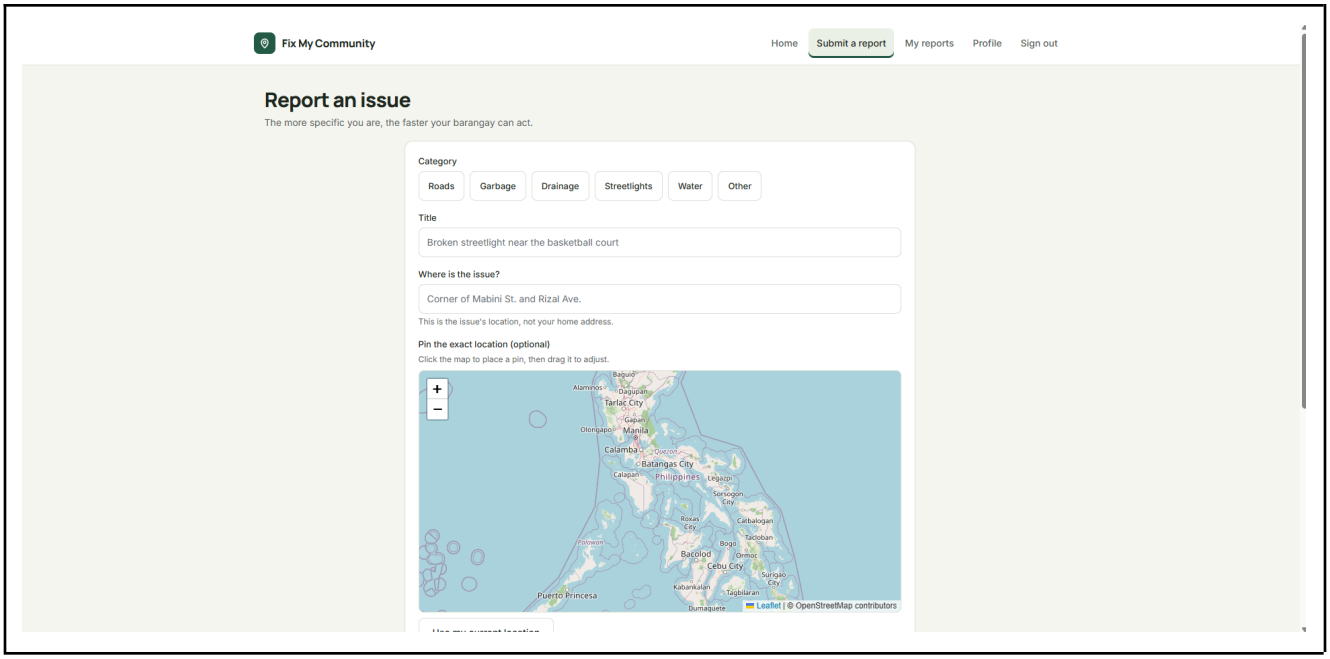

Figure 3. Community Issue Reporting Form

Allows residents to enter the details, category, and location of a community issue before submitting the report.

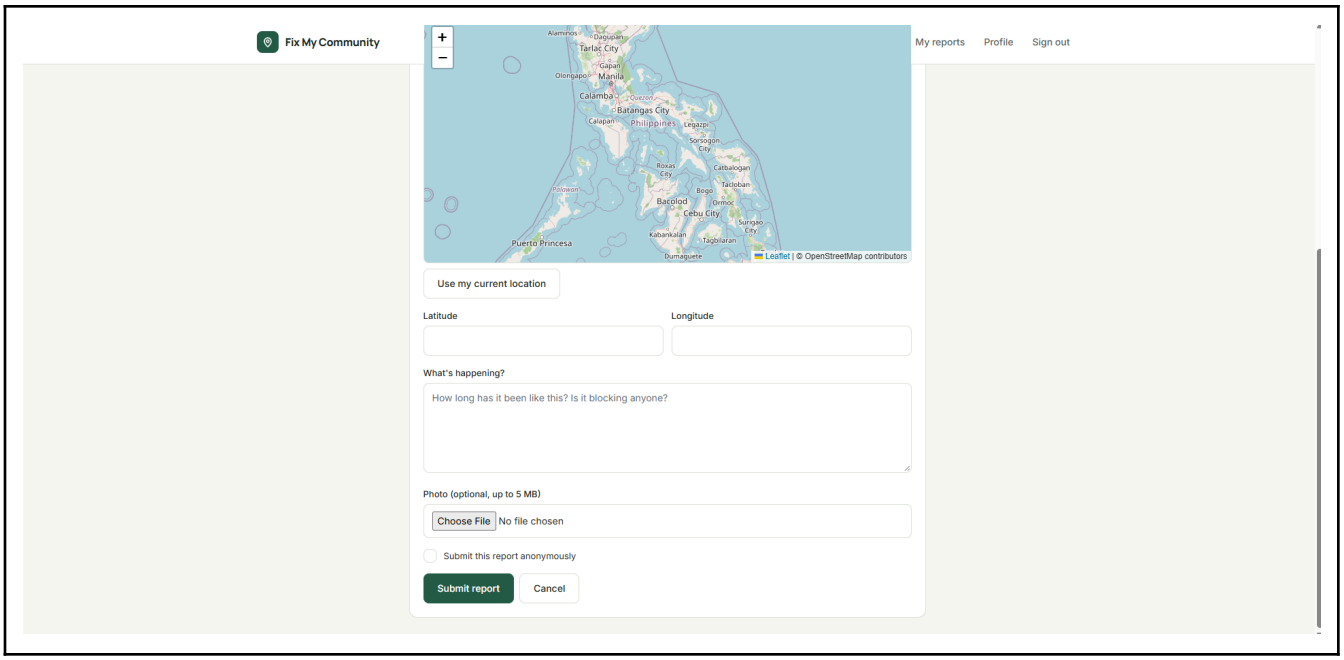

Figure 5. Report Tracking Page

Displays the details and current status of a report so residents can monitor its progress.

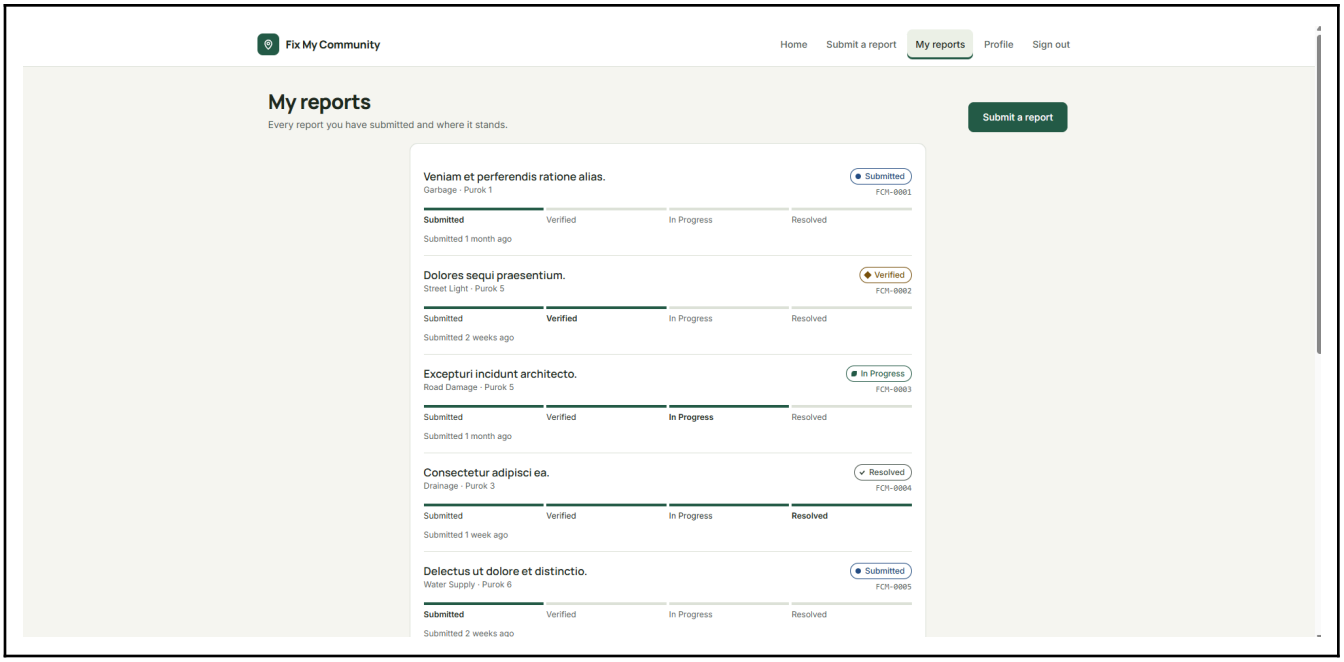

Figure 5. Administrator Dashboard

Presents report statistics and an overview of community concerns to support administrative monitoring.

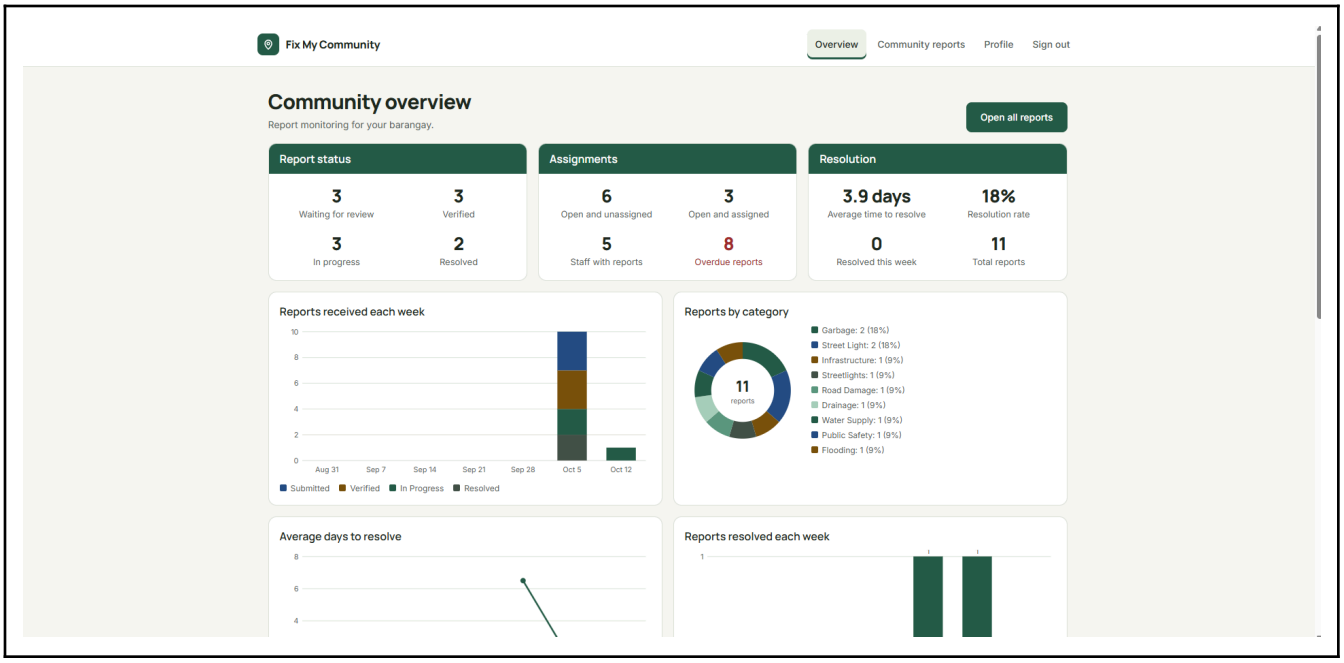

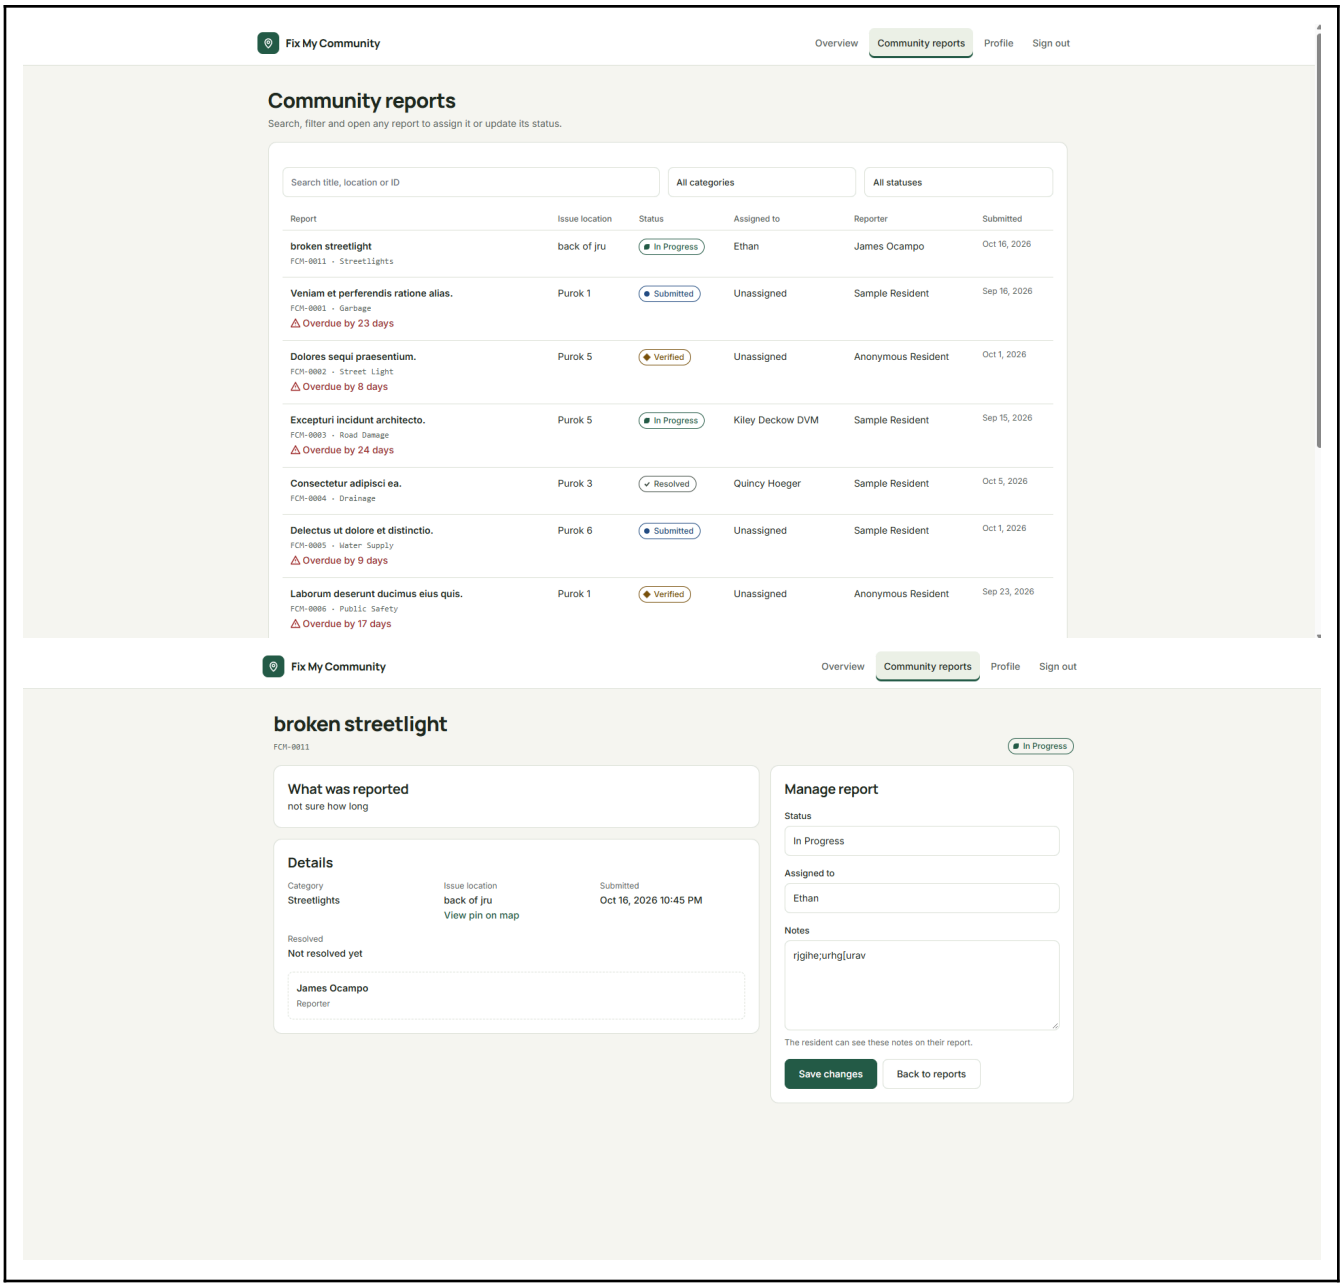

Figure 6. Report Management Page

Allows administrators to review report details, update statuses, and manage reported community concerns.
